EXPERIENCE

July 2017 - September 2021

Electrolux Professional Group | Stockholm, Sweden

Service Technician

- I was responsible for a district in Stockholm, where I handled the repair of professional laundry equipment and conducted annual service on the machines. This role involved various tasks such as scheduling and planning the workday, booking appointments, providing follow-up with customers, ordering spare parts, documenting the work, and handling invoicing.

October 2009 - July 2017

Jenils Åkeri AB | Stockholm, Sweden

Supplier/Installer

- I have carried out deliveries and installations of home appliances at Elgiganten's customers' homes, as well as recycling of old products. I have also been responsible for installations at our transport company and have taken charge of training new staff.

June 2008 - September 2009

UFS Service AB | Stockholm, Sweden

Structural Steel Fitter

- I have worked closely with welders at large industrial sites and heating plants, where my tasks have included preparing work for the welders, acting as a fire watch, and performing other assisting duties.

PERSONAL LETTER

Hello!

I am a dedicated and ambitious aspiring developer with a strong passion for technology and problem-solving. Having started my education as a .NET Developer at Nackademin Yrkeshögskola, I feel it's time to find an internship where I can continue to grow, share my previous experience, and learn new things. I hope your company is the place where I can take the next step in my career.

Work experience that has laid the foundation for my development:

I have had the privilege of gaining broad experience across various industries, which has given me a strong work ethic, a solutions-oriented mindset, and the ability to quickly adapt to new challenges. Here are some examples:

- Assembler in the industrial sector: I participated in projects such as the rebuilding of the Scania factory and a heating plant, where precision and safety were crucial.
- Installer and supplier of home appliances: At Elgiganten, I focused on customer service and contact, taking responsibility as the installation manager for our transport team.
- Service technician at Electrolux Professional: In my most recent role, I managed a district in Stockholm, performing repairs and maintenance of professional laundry equipment, handling customer relations, and documenting my work meticulously.

These experiences have provided me with valuable insights into teamwork, managing customer relations, and the importance of delivering high-quality work in every task.

Why IT?

IT is an industry where the opportunities are endless, and learning never stops. I chose to further my education as a software developer because I want to use my logical thinking and problem-solving skills to create solutions that make a difference. My background has given me a strong foundation in working in a structured, goal-oriented manner, which I now combine with new knowledge in system development.

My key strengths:

- Teamwork: I find it easy to work in teams and build strong relationships with both colleagues and customers.
- Customer-focused: I always prioritize the customer and strive to deliver solutions that not only solve problems but exceed expectations.
- Attention to detail: I value quality and precision in everything I do.

Why I want to work with you:

I am looking for a company where I can be proud to be part of the organization – a place that shares my values of development, sustainability, and quality. I am confident that I can contribute both my technical knowledge and previous experiences, while also having the opportunity to grow alongside your team.

I look forward to the opportunity to meet with you and share more about how I can contribute to your team.

Best regards,
Dimitri
